GPSports Analysis

- Featuring a universal data export to the Windows & Mac formats (csv, txt, kml, excel files) - Create a customizable profile for the athlete (for all teams, or for individual players). A physical (sportswear, footwear, etc.) and performance (training, game, etc.) profile are available for each player. Create as many profiles as you like. Each profile can be for all the competitions, or just for a single sport or season. - This FREE application has been designed to be used on your phone, with the information of

your players available at your fingertips. All you have to do is download the application to your phone, open it, and then follow the instructions on the screen. The application will automatically download the required data from the device when the player is connected. - Use the GPSports Analysis to do the following: - Track your players on the pitch/field or court - Track your players during different training sessions - Track your players during different matches/competitions - Track your players during different periods of the year - Track your players during the training and competition periods - Track the career paths of each player - Customizable GPSports Analysis Features: - Track your players in all competitions, and also only in: - World cups/tournaments - European leagues - National leagues - Other leagues (Constant KML File Upload, Save to Disk, Export to KML) - Create your own "Custom" File, with Custom data for your players: Location, Team, Age, Team, Birth Year, Age, Height, Weight, Goals, Team, Equipments/Supplement/Clothing, Team Ball, Shoes, Sweater, Shirt, Socks, Heartrate Gear, etc - Download, Export and Import data to all the known GPSports Analysis Sources: - Improve your football skills by tracking where you improve your game during the season. - Save your game with your jersey number and color - Set Goals and Track your progress by analyzing your data in the GPSports Analysis Database - Players Analyze their progress with the Yearly, Monthly, Daily and Even Hourly Reports - Automatically re-direct to the position of your player on the pitch/field/court during the game/training/competition - Re-directs to the position of your player when the GPS/HR device is disconnected - Customizable Settings (Time, Date, GPSports Analysis Database, Player Prof b7e8fdf5c8

GPSports Analysis Serial Key

GPSports Analysis is a handy, easy to use application specially designed to offer users a sports analysis tool, that allows coaches and athletes to track the distances, speeds, heartrate, and other performance metrics of players wearing a gps and heartrate tracking device. This application may be used by any sport, but it is more suited for cycling or sports where the anaerobic threshold is frequent Features: - Find the right heartrate zones to perform - Top up the internal battery - Create weekly reports with analysis and statistics - Organize data by sessions, results, laps and time - compare your performance against other athletes from worldwide - Export charts and graphs to PDF * Pathfinding by Mathews Correa * Homepage Slideshow by Hard Dynamic * Internal markers for indoor workouts * Stats: distance, speed, heartrate, heartrate zones, calories, steps and other stats from your sports * SOS function that allow you to delete markers and start over * Workout mode * Choose a race with your results and track your path * Playing functions for effort and motivation for those that train alone or in a group * Map with stages and roads for cycling races, other long courses and other sports * Stats, lap and time * Start to track markers by clicking on the map on the same line that you want to track (you can even export previous maps) * Select a start and end point on the map * Features and tags - Aton by Gigi Dutaia * Edit your own speed and heartrate zones at any point on the map * Save and load the map with the position of markers * System of sports having the same area for long and short distances, or the same heartrate zones to reach the anaerobic threshold during short and long runs (e.g. sprint or marathon) * Choose from 4 riding styles (flat, hill, road, etc.) * Choose between pedaling only or riding plus walking * Distance to be recorded in a lap or a path (long or short distance) * View your results and path with the course and sport selected * Move and click on each marker to get more info * Preconfigured routes (all countries, or by country) * Loading of routes and stages (for sports like triathlon, running, cycling, marathon, etc) * Adjust distance of stages and paths * GPS and heartrate paths can be closed or erased,

What's New in the?

===== In its quest to offer users an accurate performance analysis, GPSports Analysis was designed from the ground up to offer 100% accuracy in the capture of the most important performance metrics - position, speed, heartrate, and GPS track. This provides all sports coaches and athletes with an easy-to-use tool for a more complete understanding of their athlete's performance. The application is designed to work with any set of GPS/heartrate devices (Garmin FR235C/FR610, Polar Electro Edge 400, Polar V800/V800S, WildHeart, BlueAnt), allowing it to collect the data from all possible sources. Please note that the product is designed to work ONLY with the following GPS and Heartrate devices: ****FAMOSA**** Garmin FR235C, FR610 ****POWERSPORTS**** Fenix 5, Fenix 3 ****CASE STUDIES:**** Two Case Studies have been added to help visualize some of the most common sports applications of the product; - Football: - Basketball: - Equestrian: The data captured by the application are analyzed by means of a simple button press, and the user will be shown the following performance metrics: ****Positions**** - Distance: meters, meters/minute and kilometers. - Position: GPS position reported by GPSdevice, or by Auto position from the GPS/Heartrate device. ****Speed**** - Speed: MPH, KPH, and KPH/minute. ****Heartrate**** - Heartrate: beats per minute. ****GPS Track**** - GPS Track: GPS position reported by GPS device (GPS/Heartrate), or by Auto position from the GPS/Heartrate device. ****Features**** - Distance: Distance between positions. - Speed Speed at each position. - Heartrate Heartrate at each position. - GPS Track GPS position at each position. - Distance Distance covered by the athlete between two GPS positions. - Heartrate Heartrate collected at each position. -

System Requirements For GPSports Analysis:

Supported Operating Systems: Windows 7/8/8.1/10 Minimum Processor: Intel(R) Core(TM) i3-2310 CPU @ 3.30GHz or AMD(R) Phenom(R) II X4 945 Processor @ 3.20GHz Memory: 8GB RAM Storage: 200MB free HDD space Graphics: NVIDIA GeForce GTX 660 Video: Intel HD Graphics 4000 or AMD Radeon R5 M230 Additional Notes: By downloading this game, you accept these terms of use
